In 1980 Rover obtained US type approval for the SD1 and re-entered the American market after a ten-year absence. The car was only made available as a single variant, using a modified version of the V8 engine and badged simply as "Rover 3500". The equipment and trim levels were similar to that of the UK market's then top-of-the-range V8-S model.

Rover SD1 - Wikipedia

Before 1994, the Discovery was available with either the 2.5-litre 200 Tdi engine or the 3.5-litre Rover V8. Early V8 engines used a twin SU carburettor system, switching to Lucas 14CUX fuel injection in 1990. A 2.0-litre petrol engine from the Rover stable was briefly available in a model known as the 2.0-litre Mpi I4.
